SAUDI ARABIA

POST SHOW REPORT

2016

The perfect stage for success in a key growth market

Major manufacturers, industry experts from Saudi Arabia's supply chain, logistics and warehouse business shared the stage at the Kingdom's dedicated materials handling event. Materials Handling Saudi Arabia was launched as the construction, automotive, retail and public sectors fuel demand for the latest warehousing and logistics & distribution solutions in an industry that is constantly on the move.

26 top line global and local companies staged in tandem with the Supply Chain and Logistics Forum, with a panel of 17 industry experts, created a dual platform with a focus on new technologies in logistics and distribution, and the future opportunities and challenges of Saudi Arabia's warehouse and logistics supply structure.

Exhibitor Testimonials

“ For the past several years since we started doing business in the Middle East, Daifuku came to an understanding that Saudi Arabia has more potential for the storage and factory automation market than any of the other Gulf countries. KSA is an important marketplace for us, and therefore it's important for us to be here this week to build brand awareness and generates some strong sales leads. ”

Andrey Kras,
Account Manager
Daifuku's International Business Department

“ Saudi Arabia is the most important marketplace in the GCC, with extraordinary growth potential in the long run and growing demand for more sophisticated yet efficient storage and handling solutions. We're highlighting the beginning of a new era of materials handling systems, namely Integrated Standard and Combi Logistics Solutions. The KSA is on the way to new frontiers in intralogistics and related industries and it's our duty and pleasure taking up the task of ensuring it'll keep its competitiveness and attractiveness for years to come. ”

Paul Duerschnabel,
General Manager
Saudi Arabia & Northern Africa SSI Schaefer

“ Log Square is an intralogistics solution and system integration provider, from simple storage systems to highly automated applications that are designed, engineered and deployed by an in-house team of professionals. Traditionally our customer base is mainly FMCG and retail in addition to airport logistics and catering services, however our engineered solutions are gaining way in the automotive sector. The Saudi market is vital for the material handling applications, namely those involving automation. The manufacturing base and size of the market makes it a natural environment for our services. ”

Jacques Adem,
Executive Director
Log Square
